Meet the Alters Family

When Susie was 34 weeks pregnant, she was diagnosed with COVID and admitted to the hospital. This was a scary time for our family as Susie had a bad case of COVID and double Pneumonia, and at that time, not much was known on how to treat pregnant patients who had COVID. Fortunately, she had a great team of doctors who were able to connect with other medical professionals in the region to discuss how to best treat Susie. She recovered and was released just shy of being in the hospital for 2 weeks.

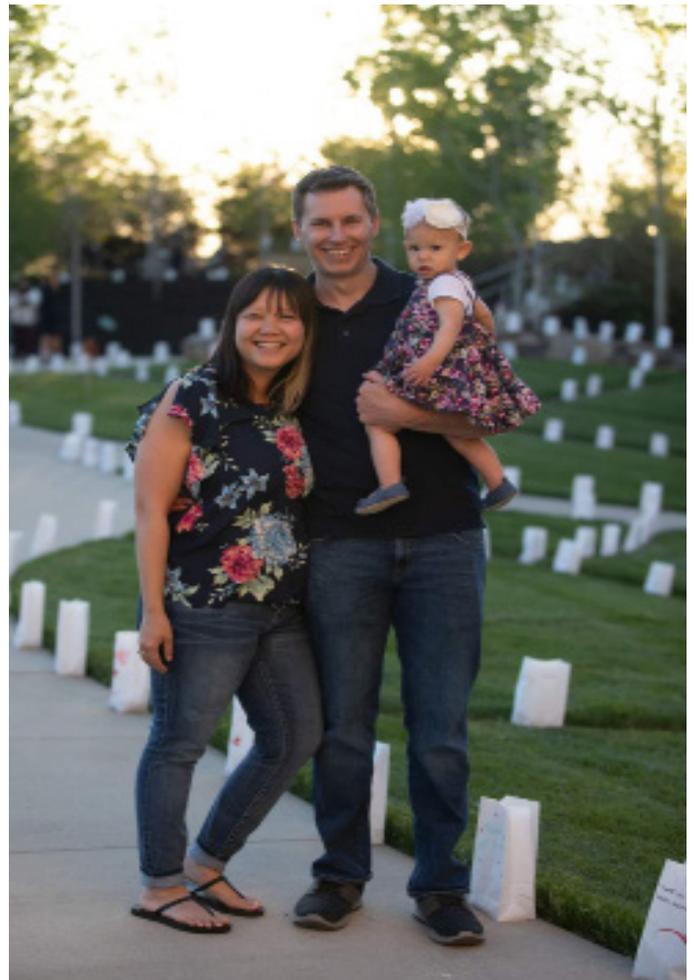

A few weeks later our daughter Lily was born by emergency c-section after showing signs of fetal distress. Upon her arrival, doctors noticed Lily was suffering from Meconium Aspiration Syndrome and later discovered she had a collapsed lung. Lily was sent to Geisinger Medical Center, and we were able to utilize the nearby Ronald McDonald House while she was being treated.

With Susie's COVID scare and now Lily needing specialized care, the Ronald McDonald House was a huge blessing for our physically, mentally, and emotionally exhausted family. The feeling of

community as soon as you walk through the doors, even in the midst of the pandemic, was something we will never forget.

Lily recovered within a few days so our stay was relatively short, but we have nothing but the highest praise we can offer for the facility and staff; taking care of our family during a very unsettling time.

Thank you Ronald McDonald House!
